

Thatch Control and Lawn Care

Product Description

BioBug TL* is specially formulated and packaged for maintenance of lawns, golf turf, and other greenspaces. This product will help control thatch, reduces the need for other nutrient and fertilizer supplements and results in a more resilient and healthy lawn.

This product contains specific strains of natural soil microorganisms that are selected for their ability to degrade the lignocellulose components of thatch. These microbes are combined with natural biological enhancers, enzymes, micronutrients and macronutrients to produce a synergistic effect and supply the best results. Using BioBug TL* will ensure that the optimal balance of enzymes and microbes is reached for thatch degradation.

Application

This versatile product may be applied via fertilizer spreader as a dry powder, or mixed with water and sprayed evenly over the turf. Avoid flowers and plants of sensitive nature. For best results, apply in liquid form after mowing.

Results will vary with climate and temperature conditions, as well plant species.

Specifications

Form:	Free-flowing granular powder
Color:	Brown
Nutrient Content:	Micronutrients & Biological Stimulants and Enhancers

*Thatch Control
for Beautiful Greens*

Packaging

250 grams water soluble packages protected by a foil overwrap. 10 kilos per plastic pail.

Storage

DO NOT FREEZE! Store in a cool dry location. Do not inhale dusts, avoid excessive skin contact. SEE M.S.D.S.

Steps to be taken if material is released or spilled

Wear eye and skin protection. Avoid discharge to natural waters. Small spillages can be washed away with large amounts of water. Large spillages, if contained, can be returned to container.
