

Pet Stain & Odor

Descriptions

Although there are a number of cleaning products available for pet stains and their associated odors, they offer only a temporary solution. These cleaners are typically surfactant based with an added fragrance or masking agent, capable of washing away just some of the components of urine. They leave behind uric acid crystals which will continue to emit odors when they come in contact with any moisture. Even if the smell is imperceptible to people, animals' keen sense of smell will attract them to the spot again and again to mark their territory.

BIOBUG PET* liquid is a custom formula designed to address all aspects of pets stains. It is a concentrated formula containing a synergistic blend of microbial cultures that produce the enzymes capable of degrading uric acid crystals. Once applied, BIOBUG PET* immediately begins to breakdown the urine, feces, vomit, or other mess left by your pet. The enzymes will completely eliminate all traces of the waste from your carpet, upholstery, tile, and vinyl. Even your pets will not be able to detect any traces of odor.

BIOBUG PET* is professional strength and can be used by hand as a spot treatment or in a carpet cleaning machine. When used as directed, it is harmless to people, animals, and the environment and is completely biodegradable.

Specifications

Form: Free-flowing liquid
 Color: Brown, Natural
 Fragrance: Citrus

Packaging: Quarts, Gallons, 5 Gallons, 30 & 55 Gallon Drums.

Storage: DO NOT FREEZE! Store in a cool dry location. SEE M.S.D.S.

Your local Distributor is:

Benefits of BIOBUG[®] PET:
