

Biological Urinal Blocks

BIO-SYSTEMS
INTERNATIONAL

Product Description

BioBug UR are made of non-pDCB ingredients, composed of specially formulated bacterial cultures. These blocks are packaged for direct addition to urinals to reduce odors and blockages. This product contains powerful biological cleaning agents, proven to maintain clear and odor free urinal traps and lines. **BioBug UR** are specially designed to be safer and less damaging than conventional chemical, pDCB, urinal blocks.

The bacteria contained in this product are non-pathogenic and are on the US TSCA inventory as well as the Canadian DSL list. The non-pDCB formula is a unique combination of protease enzymes, surfactants and bacteria blended with additional cleaning and water softening agents, odor blocking fragrance, and coloring. **BioBug UR** are suitable for all types of urinals, stainless steel, porcelain, and ceramic troughs. When used as directed, **BioBug UR** are safe to people and the environment.

CLEANS &
FRESHENS

BioBug UR are cost efficient and can save money by reducing the frequency of urinal flushing because they dispense bacteria, water softening agents, and enzymes into the pipelines each time the urinal is used or flushed. The unique formula targets and cleans scaling build-up as it deodorizes.

Packaging: **BioBug UR** are packaged for customer ease and convenience in pails containing 600 blocks, 300 blocks and 50 blocks each.

Specifications
